Heavy Duty Office Paper Shredders

Ameri-Shred offers four models of Heavy Duty Office Paper Shredders. With precision-ground alloy steel cutters, durable all-steel construction, and Whisper-Quiet operation, these shredders are the most effective and least expensive way to dispose of confidential information.

Dimensions - Each shredder measures 38 1/2 in. high x 26 1/2 in. wide x 45 in. long with a stand. Each successive model has more power, a larger drive and greater shredding capacity. All components, including shafts, cutters and bearings, are sized for the largest horsepower in the series and are manufactured from high quality materials typically found in rugged industrial machinery.

Self-Adjusting Cutter Head - The precision-ground, alloy steel cutters are self-sharpening and durable enough to shred large and small paper clips, staples and Acco fasteners as easily as paper. The cutters are warranted for ten years and include a self-adjusting cutter head which eliminated the need to contact a service technician for manual adjustments.

Shred Width - All models of Ameri-Shred Heavy Duty Office Shredders can shred up to 16 in. wide paper into 1/8 in. or 5/16 in. wide strips.

Capacity - Standard capacity and horsepower is listed below for each of the four models of Heavy Duty Office Paper Shredders.

Heavy Duty Office Paper Shredders								
Model Number	Throat Opening	Shred Width	1/8" Capacity (sheets)	5/16" Capacity (sheets)	Horse Power	Weight (lbs.)	Shredding Speed (fpm)	Amount Shredded per Day
AMS-50	16"	1/8" or 5/16"	11	22	1/2	235	54	12" or less
AMS-75	16"		18	35	3/4	245	40	1' to 3'
AMS-100	16"	5/16"	27	53	1	255	32	3' to 5'
AMS-150	16"		32	65	1 1/2	265	32	5' to 10'

► Ameri-Shred models of Paper Shredders offer wide variety of shredding requirements, appearance, design, and compliance.

Ameri-Shred AMS-50 guaranteed clarity.

► Rugged, all-steel construction allows for years of reliable service. All parts are manufactured within precise tolerances, ensuring minimal lifetime maintenance cost.

Meeting Customer Expectations

"Two years ago the Fort Bend County Recycling Center purchased the Ameri-Shred 2500 shredding machine with conveyor and box lifter. We have had very good results from this piece of machinery, with little to no problems. This machine has been an asset to our recycling program."

Gary D. Coffey
Recycling Coordinator

"I am writing to let you know how well the shredder we purchased from your company is working for us. We updated our equipment to the Ameri-Shred AMS 4000 about two years ago and it has performed very well for us. It has been low maintenance and very dependable. I would recommend your equipment to any company looking for a good quality shredder."

David Sharp
High Hope Recycling and Shredding Service
Milan, MI

"It has been many years since we purchased our first Ameri-Shred shredder.

We would not consider purchasing any other shredder for document shredding. We don't believe there is any other shredder that can compare in toughness, quality and reliability as the Ameri-Shred shredder.

We have an AMS-2000 and an AMS-6000 which have run day in and day out without any problems for 10 plus years."

Gideon D. Leiby
J.P. Paper Shredders, Monrovia, CA

Plant Capacity of 100 tons per month

Ameri-Shred offers several models of Heavy Duty Office shredders to satisfy a variety of shredding requirements. Pleasing in appearance and compact in size, these shredders do not detract from any office decor.

▶ The precision-ground, self-sharpening steel cutters will shred large and small paper clips, staples, and Acco fasteners as easily as paper. The self-adjusting cutter head eliminates the need for manual adjustments.

▶ All electrical components are housed in a totally enclosed, dust-proof unit to prevent particles from corroding the contacts and hindering the shredding operation. This entire module can be easily removed and quickly replaced if service is required.

Other Ameri-Shred Unique Features:

- ▶ A NEW cutter design processes clumps, and reduces jams to increase throughput.
- ▶ Laser cut combers for improved positioning thus greater cutter efficiency.
- ▶ Hardened main shaft surfaces under floating cutters eliminate wear, improving cutter life.
- ▶ Modified cutterhead material flow for cut uniformity and improved destruction security.
- ▶ A refined cutterhead adjustment system with greaseable adjustment plates.
- ▶ Positive overload protection - A current sensing relay automatically shuts the shredder down in case of a jam and a push-button reversing starter allows the operator to clear jams instantly and resume shredding.
- ▶ CAD engineering to meet your application design specifications and site requirements.

▶ Durable shredder stands are equipped with three shelves for storage and a removable plastic bag rack for easy maintenance. Clear, vinyl shredder bags provide clean, efficient disposal of shredded materials.

▶ The powerful, heavy duty chain drive transfers maximum power from the motor to the cutters. The AMS-150 is also equipped with an adjustable chain take-up to provide extended chain life.

An Ameri-Shred System will cut your labor costs while maximizing your profitability. If your problem is a need for high volume paper processing from sorting through destruction, an Ameri-Shred system is your answer.
