# Cross Cut Paper Shredders: Series 2

## Hopper Fed Industrial Pre-Shredders

Turn your existing strip cut shredder into a double cut shredding system without doubling your space or reducing your throughput.

A forty horsepower AMS-4000 is shown at right with a separate hopper fed pre-shredder that discharges onto its in-feed conveyor. These pierce and tear shredders offer customers that are running strip cut shredders the option of a double cut in order to produce a smaller particle size.

- Choice of horsepower and shred width
- Space saving versatility
- In-feed conveyor available
